

miniVec™

Novel miniaturized
plasmids enhancing
gene delivery

VectorBuilder's proprietary miniVec™ plasmid offers a miniaturized backbone, providing remarkable efficacy, safety, and manufacturability for cell and gene therapies.

Safety

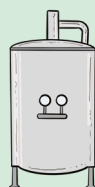

- Antibiotic- and supplement-free
- Miniaturized backbone up to **80% smaller**

Efficacy

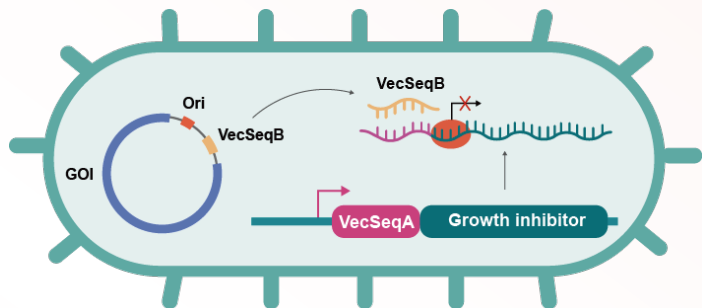

- **Higher** gene expression
- **Higher** transposon delivery

Manufacturability

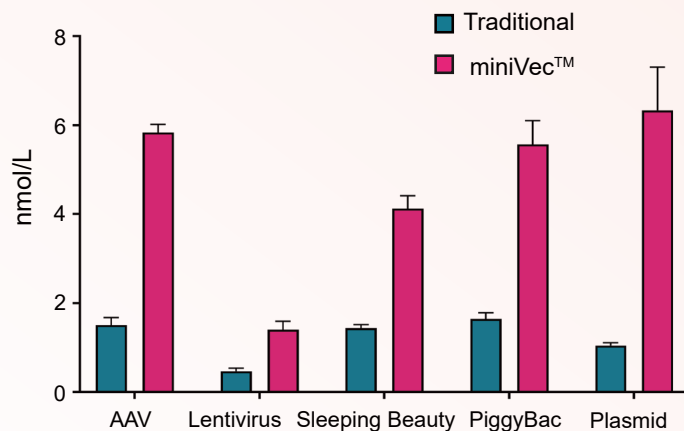

- **Higher** plasmid yields
- **Higher** virus packaging efficiency

miniVec™ technology

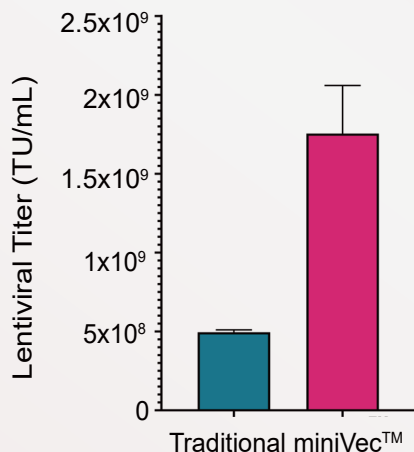

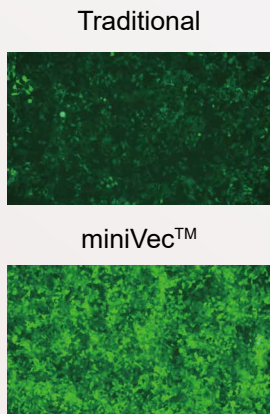

Survive and proliferate

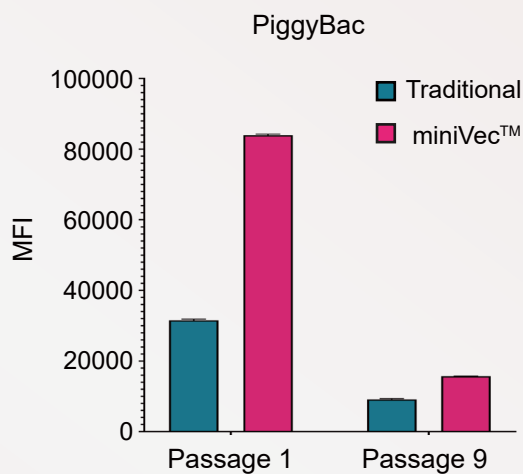

Increased plasmid yields

Safer source materials for virus packaging

Efficient transposon delivery

Enhanced transgene expression in vitro & in vivo
